Viva Rio

2014 – 2015

Host of the InfoTech Program

InfoTech was a radio program about technology conducted in two languages, Haitian Creole and French. The target audience was Haitians, which explains the choice of both languages. The idea behind InfoTech was to illustrate how today's world is divided between the real and the virtual, showcasing the comprehensive nature of technology.

The program was a success and greatly aided people, specifically the Haitian community, in understanding and mastering various concepts of information technology and communication applied in different fields.

Mundvs Software e Serviços Ltda.
